# Fresh-key

FRESH-KEY RT

Real-time disposable location/temperature data logger

Fresh-key RT is made for real-time temperature and location monitoring, they are disposable devices specified for national and international fresh and food shipments.

With only one button operation, they are quite easy to be deployed. While they are working, you can track all temperature, humidity and location information of your shipment online through any web browser.

You may also register with our online system to manage multiple shipments, maintain all history and collaborate with your partners.
